

## **CLAIMS**

### **What Is Claimed Is:**

- 1 1. A toy shopping cart, comprising:  
2 a frame comprised of a pair of leg assemblies secured together by a  
3 plurality of cross-members;  
4 the pair of leg assemblies having wheels at lower ends thereof and a  
5 handle connected between upper ends;  
6 a basket removably held in a front portion of the frame;  
7 a seat removably held in a rear portion of the frame; and  
8 a channel on one of the plurality of cross-members for supporting the  
9 basket and seat in the frame.
- 1 2. The toy shopping cart of claim 1 wherein the basket includes a housing  
2 with a handle and a rim along an outer periphery on a top edge of the housing.
- 1 3. The toy shopping cart of claim 2 wherein the channel is formed from a  
2 front portion and a rear portion, and wherein the rim cooperates with the front  
3 portion to hold the basket on the frame.
- 1 4. The toy shopping cart of claim 3 wherein a second of the plurality of  
2 cross-members supports a base of the basket in the frame.
- 1 5. The toy shopping cart of claim 4 wherein the seat has a chair portion and  
2 a tray, and a holding portion on a rear surface of the chair portion.
- 1 6. The toy shopping cart of claim 5 wherein the holding portion cooperates  
2 with the rear portion to hold the seat on the frame.

1 7. The toy shopping cart of claim 1 wherein the channel is formed from a  
2 front portion and a rear portion, which front portion and rear portion cooperate  
3 with the basket and the seat to removably hold the basket and seat on the  
4 frame.

1 8. The toy shopping cart of claim 7 wherein the seat has a chair portion and  
2 a tray, and an open holding portion on a rear surface of the chair portion, and  
3 the open holding portion cooperates with the rear portion to secure the seat on  
4 the frame.

1 9. The toy shopping cart of claim 8 wherein the basket has a housing with  
2 an open top, a rotatable handle and a base; and the housing is sized and  
3 dimensioned to fit into the frame and have its base supported on a second of  
4 the plurality of cross-members.

1 10. The toy shopping cart of claim 9 wherein the housing has a rim formed  
2 along an outer periphery on a top edge of the housing.

1 11. The toy shopping cart of claim 10 wherein the rim hangs on the front  
2 portion to support the basket on the frame.

1 12. The toy shopping cart of claim 1 wherein the seat has a chair portion, a  
2 tray, and an open holding portion secured on a rear surface of the chair  
3 portion.

1 13. The toy shopping cart of claim 12 wherein the channel includes a front  
2 portion and a rear portion, and wherein the open holding portion is slipped  
3 onto the rear portion to hold the seat on the frame.

1 14. The toy shopping cart of claim 13 wherein the basket has a housing with  
2 an open top, a rotatable handle, a base and a rim formed along an outer  
3 periphery of the open top, whereby the rim may be hung on the front portion to  
4 support the basket on the frame.

1 15. A toy shopping cart, comprising:  
2 an open frame comprised of a pair of leg assemblies have front and rear  
3 portions secured together by a plurality of cross-members;  
4 the pair of leg assemblies having wheels at lower ends thereof and a  
5 handle connected between upper ends;  
6 a basket having a housing with an open top, a rim along an outer  
7 periphery of the open top, a rotatable handle and a base, removably held in a  
8 front portion of the frame;  
9 a seat having a chair portion, a tray, and an open holding portion  
10 secured on a rear surface of the chair portion removably held in a rear portion  
11 of the frame; and  
12 a channel secured on one of the plurality of cross-members for  
13 supporting the basket and the seat in the frame.

1 16. The toy shopping cart of claim 15 wherein the channel includes a front  
2 portion and a rear portion, and wherein the rim hangs on the front portion to  
3 support the basket on the frame and the open holding portion hangs on the  
4 rear portion to hold the seat on the frame.

1 17. The toy shopping cart of claim 16 wherein the housing is sized and  
2 dimensioned to fit into the frame and have its base supported on a second of  
3 the plurality of cross-member.

1 18. A toy shopping cart, comprising:  
2 an open frame comprised of a pair of leg assemblies have a front portion  
3 and a rear portion; the pair of leg assemblies being secured together by a  
4 plurality of cross-members and having wheels at lower ends and a handle  
5 connected between upper ends;  
6 a basket held in the front portion of the frame; the basket having a  
7 housing with an open top, a rim formed along an outer periphery of the open  
8 top, a rotatable handle held in the open top and a base;  
9 a seat held in the rear portion of the frame; the seat having a chair  
10 portion, a tray, and an open holding portion secured on a rear surface of the  
11 chair portion; and  
12 a channel secured on one of the plurality of cross-members; the channel  
13 including a front portion and a rear portion, and wherein the rim hangs on the  
14 front portion to removably support the basket on the frame and the open  
15 holding portion hangs on the rear portion to removably hold the seat on the  
16 frame.
